

KingDom
Paint Protection Film

KingDom is a top-of-the-line PPF film exclusively for super sports cars that finds the causes of dirt, dust, and stains, blocks them using very low surface energy, and releases contaminants. In addition, the nano-high molecular elastic polymer used in KingDom removes pressure and scratches on the surface over time, and provides yellow dust, cracks, peeling, stains, and UV protection. KingDom is the most reliable choice for almost complete protection of painted surfaces from flying stones, debris and scratches with just one film.

The most important feature of KingDom PPF is that even when the film is peeled off, it uses a special adhesive that leaves no adhesive behind and does not damage the vehicle's painted surface. In addition, it boasts the best water repellency and is equipped with an anti-graffiti function.

KingDom PPF can easily install complex shapes of bumpers, side mirrors, headlights, etc. due to its specialized adhesion, softness, and excellent elasticity. In addition, it is a high-end quality film that minimizes adhesive stop-lines that may occur during reinstallation, and provides a very clean surface and result after installation.
